

ST933c ONTAP Troubleshooting

Kurzbeschreibung:

Analyse and identify Hardware- and Configuration issues

Zielgruppe:

Experience NetApp Partner employees

Voraussetzungen:

NCDA certification and several years of ONTAP experience is absolutely necessary.

Sonstiges:

Dauer: 4 Tage

Preis: 3600 Euro plus Mwst.

Ziele:

In this workshop the students learn methods to analyse hard- and software problems and how to use tools to check the system configuration.

This training is a prerequisite for the NetApp NS0-590 Certification (NCSE ONTAP Specialist)

Inhalte/Agenda:

- ONTAP Troubleshooting
 - ◆ Clustershell Tipps and Tricks
 - ◆ Systemshell and FreeBSD
 - ◆ Kernel modules and Cluster Services
 - ◆ Essential Processes and Watchdog Daemon
