

BS100 CSAF Writing Boot Camp (For Beginners)

Kurzbeschreibung:

Beginners receive a practical introduction to the Common Security Advisory Framework (CSAF), an open standard for machine-readable security advisories. The course covers structure and benefits of CSAF documents and their importance for vulnerability management. In hands-on exercises, participants create their own CSAF advisories and use tools like the BSI “Secvisogram” editor for creation and validation.

Zielgruppe:

The workshop **BS100 CSAF Writing Boot Camp (For Beginners)** is designed for professionals who create or use security information and want to learn CSAF from the ground up, including:

- Product security officers in IT companies (PSIRT members)
- Staff members of CERTs or IT security departments
- IT professionals working in vulnerability management and security

Voraussetzungen:

No specific prior knowledge is required for the **BS100 CSAF Writing Boot Camp (For Beginners)**. A basic understanding of IT security and software vulnerabilities is helpful but not mandatory. A willingness to learn new technologies and an interest in security advisories are expected.

Fluent English communication skills, verbal and written, are mandatory.

Sonstiges:

Dauer: 1 Tage

Preis: Euro plus Mwst.

Ziele:

In this workshop **BS100 CSAF Writing Boot Camp (For Beginners)** you will learn how to:

- Understand what CSAF is and the added value the standard provides for your organization and customers
- Independently create and structure a valid CSAF security advisory
- Apply tools and best practices for creating and validating CSAF documents (e.g. Secvisogram, CSAF Validator)
- Prepare vulnerability information in a standardized way to enable automated processing

This workshop **BS100 CSAF Writing Boot Camp (For Beginners)** serves as a foundational basis for the advanced CSAF workshops The CSAF Writers’ Guild – Advancing Your Experience and CSAF distribution – from scratch to publication.

Inhalte/Agenda:

- The training considers the new revision 2.1 of the CSAF standard.
If the new version has already been released at the time of the training, we will work hands-on with exercises based on revision 2.1.
If the release is still pending, you will receive an exclusive preview of the planned enhancements and their significance for practical implementation.
