

ST980 OnCommand Insight Operations and Best Practices

Kurzbeschreibung: SAN-Management with OnCommand Insight (SANscreen) - Installation and Administration	Ziele: We enable the participant to monitor his storage-environment continuously, to identify weak points in an early stage and to correct them. Besides he is able to detect resource bottlenecks and trends, as well as collecting the necessary planning data. The participant also learns how to monitor and record any kind of changes in his SAN.
Zielgruppe: Architects, planers and administrators of storage-environments.	Termine Will be scheduled on request Please let us know here , when you prefer to have this workshop!
Voraussetzungen: Hands-On experience with the installation and administration of a storage environment.	
Sonstiges: Dauer: 5 Tage Preis: 4500 Euro plus Mwst.	

Inhalte/Agenda:

- OnCommand Insight Architecture
 - ◆ Software-Architecture and components
 - ◆ Module overview and their features
 - ◆ Discovery-process
 - ◆ User-Interface (GUI, SOAP, Mail, SNMP)
- Installation planing
 - ◆ Sizing and Layout
 - ◆ Network-Topology and allocation of the acquisition units
 - ◆ Interface to the SAN/NAS components
